

YOU AND YOUR KIDS ARE BEING POISONED

Suppose your son or daughter is continuously dosed with a toxin that blinds, drops intelligence, eradicates memory, grows brain tumors and other cancers, brings fatigue. Depression, ADD, panic, rage, paranoia, diabetes, seizures, suicide and death. Suppose the toxin is supported by unlimited advertising and the manufacturers pay off the American Dietetics Association, the American Diabetics Association, the AMA, The MS Society and whomever else, to convince us its safe as rain.

Suppose the lies are backed by a Federal Bureaucracy knowing it may kill your child, but the bureaucrat who approved the poison got a fat job as have many of his successors with the manufacturer. Suppose this government watchdog, ignoring thousands of consumer complaints, has become an Attack Dog protecting corporate corruption. Would you want the truth? What would you do to protect your child from these crimes?

No supposition! This is the bitter reality of Aspartame/NutraSweet/Equal, Monsanto, the FDA, Coca Cola, Pepsi, and the hundreds of food, drink and drug makers who add to their products a known poison conceived in Fraud and Dedicated to the Proposition that Profit is all that Matters! Below are the 92 reactions the FDA listed from 10,000 complaints under a Freedom of Information action, but you can't get the list without a congressman. FDA will ask you "What List" and may send you Monsanto propaganda! Does the FBI refer crime complaints to the Cosa Nostra?

92 DOCUMENTED SYMPTOMS REPORTED BY THE U.S. FEDERAL DRUG ADMINISTRATION

Headaches, dizziness or problems with balance, change in mood quality or level, vomiting and nausea, abdominal pain and cramps, change in vision, diarrhea, seizures and convulsions, memory loss, fatigue, weakness, other neurological, rash, sleep problems, hives, change in heart rate, itching, change in sensation (numbness, tingling), grand mal seizures, local swelling, change in activity level, difficulty breathing, oral sensory changes, change in menstrual pattern, other skin, other, localized pain and tenderness, other urogenital, change in body temperature, difficulty swallowing, other metabolic, joint and bone pain, speech impairment, other gastrointestinal, chest pain, other musculo-skeletal, fainting, sore throat, other cardiovascular, change in taste, difficulty with urination, other respiratory, edema, change in hearing, abdominal swelling, change in saliva output, change in urine volume, change in perspiration pattern, eye irritation, unspecified, muscle tremors, petit mal seizures, change in appetite, change in body weight, nocturnal, change in thirst or water intake, unconsciousness and coma, wheezing, constipation, other extremity pain, problems with bleeding, unsteady gait, coughing, blood glucose disorders, blood pressure changes, change in skin and nail coloration, change in hair or nails, excessive phlegm production, sinus problems, simple partial seizures, hallucinations, any lumps present, shortness of breath on exertion evidence of blood in stool or vomit, dysmenorrhea, dental problems, change in smell, DEATH, other blood and lymphatic, eczema, complex partial seizures, swollen lymph nodes, hematuria, shortness of breath due to position, difficulties with pregnancy, (children only) developmental retardation, change in breast size or tenderness, anemia, change in sexual function, shock, conjunctivitis, dilating eyes, febrile.

Aspartame was invented by the G D Searle Co. acquired by Monsanto in 1985. For 16 years the FDA refused to approve it until 1981 when Commissioner Arthur Hayes overruled the objections of a Public Board of Inquiry and the protests of the American Soft Drink Association and blessed it. The tests submitted by Searle were so bad the Department of Justice, initiated prosecution of Searle for fraud. Then the defense lawyers hired the prosecutors, Sam Skinner and Wm. Conlon, and the case expired when the statute of limitations ran out. If the Godfather hires the District Attorney, don't expect a conviction!

Aspartame toxicity is verified by the world's finest doctors! Access www.dorway.com for a river of evidence, the FDA complaint list, listen to doctors, get links to 200 web sites and a support group and lists of publications by medical experts. Your doctor may not know, since he's targeted for misinformation by the "authorities", Many of his patients present symptoms of fatigue, headaches, joint pain, memory loss, vision depredation and seizures which he may misdiagnose. Bring him these facts and ask him to get on-line.

ASPARTAME DESTROYS YOUNG MINDS! Educators increasingly rely on Ritalin, Prozac, and other psychoactive drugs to bring order to the classrooms. So education becomes medication. Do firemen fight smoke? Aspartame is the fire, attention deficit disorder [ADD] is the smoke from a raging atrocity consuming the brains and lives of our children!

Dr Miguel A. Baret of the Dominican Republic removed milk from 360 children's diets, because cow's milk has a specific protein that can cause diabetes, especially in children. They drank juice laced with aspartame instead and many developed "abnormal restlessness, lack of concentration, irritability and depression." When Dr Baret removed it: "The results were astonishing. Their symptoms disappeared in 4-6 days in ALL of them!" Thank you Dr Baret, for this study showing what milk and aspartame does to the brains of our kids!

Endocrinologist H.J.Roberts MD, FACP studied aspartame for 15 years, has a data base of 1,300 victims. He's declared Aspartame Disease a world epidemic. Dr Roberts was selected as The Best Doctor in the United States by the medical journal Practice 84 and authored textbooks used in training thousands of doctors. 40% of our children consume aspartame, and if your child is diabetic Roberts says aspartame will drive blood sugar out of control, destroy the optic nerves and cause diabetic convulsions. His books, Aspartame [NutraSweet] is it Safe, Sweetener Dearest and Defense Against Alzheimer's Disease should be on every doctor's bookshelf, and you need them if you or your child is a victim (www.icanect.net/sunpress).

Dr Ralph Walton, Psychiatrist, Chairman of the Center for Behavioral Medicine: "We have known for years that when aspartame is ingested with a carbohydrate rich meal the usual physiologic increase in tryptophan is blocked, while brain phenylalanine and tyrosine concentrations are increased. These changes in amino acid neurotransmitter precursors could, I believe, alter indoleamine/catediloramine balance, and thus have a profound effect on mood and cognition ... depressed mood, anxiety, dizzinesspanic attacks, nausea, irritability, impairment of memory and concentration." This doctor stated on 60 MINUTES that all Monsanto/NutraSweet funded studies show aspartame is safe but almost 100% of independent studies show problems.

Monsanto doesn't want studies done they can't control, and refused to sell Dr. Walton aspartame for his study. After one man suffered a retinal detachment, another started bleeding from the eyes and others complained of being poisoned he stopped the study. Did Monsanto know what to expect? Is the sea wet?

If your child is on medication remember aspartame's original drug application was withdrawn to market it as a food additive, requiring no monitoring of side effects. The interactions with drugs include monoamine oxidase inhibitors, alpha-methyl dopa and L-dihydroxyphenylalanine just for starters! Aspartame triggers Infertility! Women sit in fertility clinics sipping diet soda, the reason they're there!

Dr Louis Elsas, Professor of Pediatrics & Genetics at Emory University, testified before Congress: "Aspartame is in fact a well known neurotoxin and teratogen [triggers birth defects] which in some undefined dose will irreversibly produce adverse effects in the developing child or fetal brain, I am particularly angry at this type of advertising that is promoting the sale of a neurotoxin in the childhood age group." [Nov 2, 1987]

A recent study at the University of Barcelona, Spain [C. Trocho] has shown formaldehyde accumulates and damages DNA, binds to kidney and liver tissue, adipose tissue, retina, and brain. In her paper on its effects on the liver, Australia's Dr Sandra Cabot asks why would anyone consume aspartame: "I would not put it into my body because I'm not ready to be embalmed." Aspartame is, Do-It-Yourself Embalming, since it converts into formaldehyde and also formic acid, ant sting venom.

Dr James Bowen, who suffers from Lou Gehrig's Disease resulting from aspartame feels rather strongly about the problem: "Aspartame is mass poisoning of the American public and the rest of the world. ... Every known metabolite of aspartame is of marked or questionable toxicity and patently unsafe for human use. The only responsible action would be to immediately take aspartame off the market, fully disclose its toxicities, offer full compensation to the injured public and criminally prosecute anyone who participated in the placement of aspartame on the market. That includes those who work so diligently to keep it there as well."

Neurosurgeon Russell Blaylock, MD, declares Aspartame is a toxin like arsenic and cyanide that causes confusion, disorientation, seizures, cancer, pancreatic, uterine, ovarian and brain tumors and leads to Alzheimer's. Read Excitotoxins, the Taste That Kills [505-474-0303]. Hear Dr. Blaylock's radio interview on www.dorway.com Courageous whistleblowers like these have spoken in three congressional hearings, but industry's lobbying and political action keep the poison in the foods of the world. Our recourse as consumers is personal communication since the media is paid by advertising to push NutraSweet/Equal/Diet Coke, etc..

YES! YOU CAN MAKE A DIFFERENCE! For over ten years Mission Possible, an unpaid worldwide volunteer force, has raised the alarm. Results may be indicated by Monsanto and Coke stock prices. In 3 years the stock market is up 80%, but Coke is down 10%, a 90% differential! Investment in Monsanto is dead money. Now they have sold it off, no doubt to duck their liability to the law suits from a multitude of victims. The handwriting is on the wall for these cavalier devastators of humanity's health! In the UK and Europe there is now a major investigation into it's safety and many class action law suits are in preparation, particularly in the US.

Get it out of your school! Save lives by informing everyone you know!
Get it out of your home! Return asparpoisoned products to stores, get refunds!

MAKE A DIFFERENCE BY MAKING 100 COPIES OF THIS MESSAGE AND INCLUDING THEM IN EVERY LETTER, EVERY BILL, EVERY PREPAID POSTAGE ENVELOPE YOU RECEIVE. MAKE SURE EVERY TEACHER IN YOUR CHILD'S SCHOOL DISTRICT GET'S ONE.

GET IT TO ALL YOUR DOCTORS, WORKMATES, AND IF YOU RUN A COMPANY GIVE IT TO ALL EMPLOYEES AND SEND IT WITH EVERY CHECK AND BILL. MAKE THIS POISON HISTORY!

Take the 60-day No Aspartame Test . Stop all intake for 6 weeks, drink plenty of water, Often symptoms start to vanish after the first week. Send your case history to:

In the US and International - Mission Possible International - 9270 River Club Parkway - Duluth, GA 30097 USA

In Canada - Mission Possible Canada - 308-40 Bay Mills Blvd - Toronto - M1T 3P5

If you are interested in being part of a Class Action Law suit please note that on your case history.

Tell your doctor and all of your friends!

Return Asparcical products to the store. (anything with Monsanto's Aspartame/NutraSweet/Equal/Spoonful/Benevia/NutraTaste) Many other artificial sweeteners are on the market containing aspartame. **READ LABELS CAREFULLY**
